

Intended use

Designed for moving stage decks, truss parts* and decor pieces with a maximum load of 130 kg

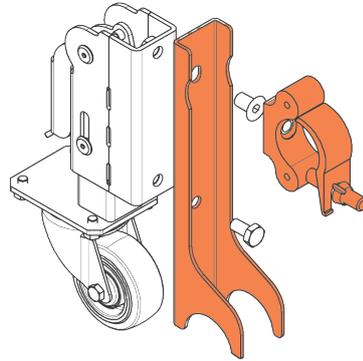

About

This lifting wheel provides so much utility you will wonder how you ever lived without it. The wheel moves up and down 4cm and can be used for **3** different applications:

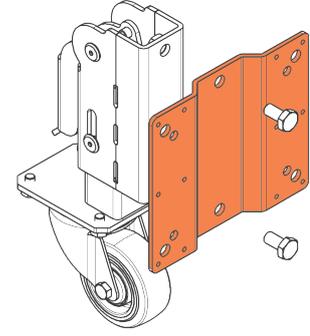

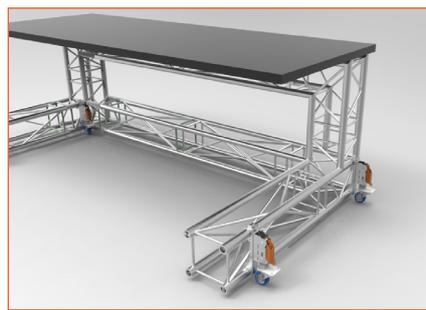

1 Stage riser:

For use underneath a stage riser. Using half couplers, the lifting wheel can be mounted on a standard leg. When lowering the stage onto its own feet, you experience greater stability and the maximum load can be applied to your stage deck.

2 As a truss mover*:

by means of our truss attachment, you can lift truss frames and roll them from the stage as a riser.

3 As a box riser:

the mounting plate attachment is the solution that attaches the lifting wheels onto wood.

Technical Specifications

- material: 4mm zinc plated metal
- lifting height: 35mm
- weight: 3 kg
- castor diameter: 80mm
- WLL castor: 130kg

* Compatible with 30 truss from: Prolyte, Eurotruss , Fantek, Duratruss, Globaltruss, Interlat, Sixty82
