Mount your equipment
quickly and reliably onto
keder profiles of all sizes.

SHARK[®]

KEDER CLAMP

Our Shark clamp is a versatile and innovative solution for quickly and securely mounting equipment onto keder rails of all sizes.

KEY FEATURES

Constant WLL

The Shark maintains a constant maximum load capacity of 200 kg regardless of the width of the beam.

Centric load

Smartly designed to always allow a centric load, unlike conventional clamps where the load is rarely centric due to the adjustments required to fit different beam sizes.

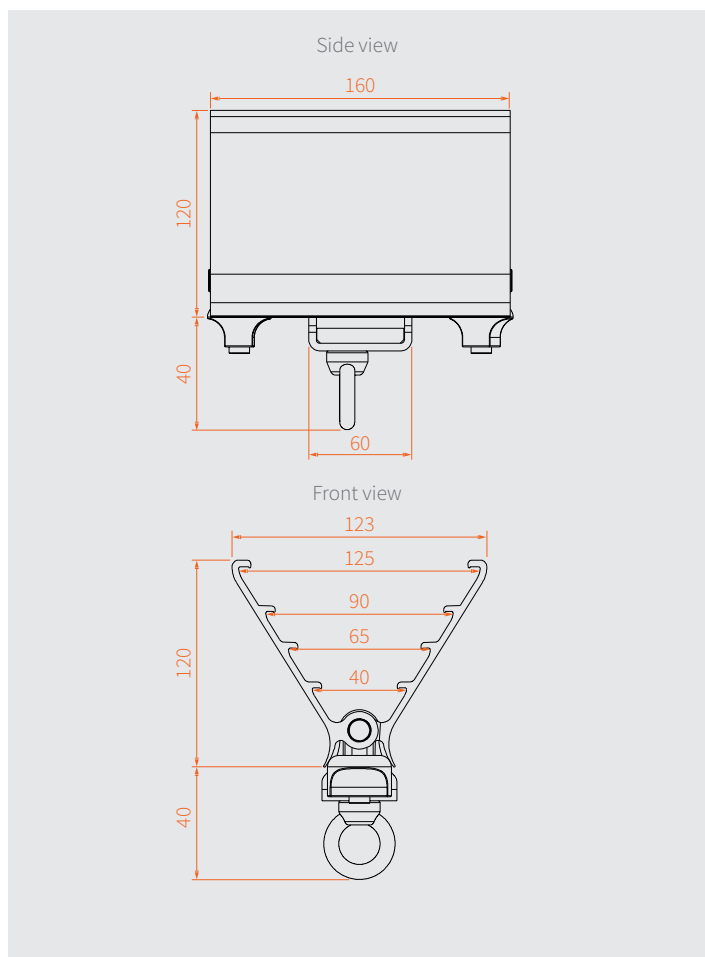

Quick assembly

Fast and easy assembly thanks to the spring loaded clamp.
