

The CASY030E/B are optional protection ears for the CASY on-wall chassis series. These ears will provide an additional protection for the protruding connectors on the chassis. The steel ears can be mounted between ABS sides and the aluminum construction of the chassis. Large access holes are provided on the ears that will align with the break-out points on the ABS material. The ears are finished in a black (RAL9004) structured and scratch resistant powder coating.

Product Features:

Dimensions	88.1 x 105 x 1.5 mm (W x H x D)
Weight	0.73 kg

Variants:

- CASY030E/B - Black
