Bracket for amaran F22 Data Sheet

Main Features

- Reinforced Aluminum Bracket for amaran F22c or F22x Fixtures
- Push-Lock Quick-Release Rod Design
- Four 2-Stage Spring-Loaded Support Rods for Intuitive Set Up and Take Down
- Rigid Folding Aluminum Construction
- Knurled Baby Pin
- Included Soft Carrying Bag

Target Audience

For filmmakers and content creators who require a more secure, rigid backbone for their amaran F22 fixture with a nimble set up and tear down process, the new Bracket for amaran F22 is the perfect answer.

Users who need to move fast with their F22 will appreciate the new Bracket's aluminum build quality and quick-locking arms, which provide stable support for F22 fixtures.

In addition, these new brackets fold down into a compact package that fits into the original F22 cases in place of the original support brackets, meaning that preexisting F22 owners who upgrade to this new bracket will not need to separately carry this accessory.

Any F22 owner will benefit from having a more rigid support bracket that is quick to build and take down, making the new Bracket for amaran F22 a perfect addition to their toolkits.

Dimensions (Collapsed)	41.9 x 7.6 x 7.6cm 16.5 x 3.0 x 3.0in
Weight	633g / 1.40lbs

Product Description

The amaran F22 Bracket is a newly designed folding X-frame that stretches the F22 into a rigid light panel. Featuring a knurled baby pin, the Bracket allow users to directly mount their F22 to a baby pin receiver, such as a gobo head, for a more stable light set up. Made to the dimensions of the F22, it provides users with a fast and simple set up and tear down process along with increased rigidity for their amaran F22 fixtures.

With a push-lock folding design, the new F22 Bracket offers a faster set up process compared to the original F22 bracket, which has a swing-out arm design that requires users to pull out locking pins to secure each arm in place. The updated F22 Bracket only needs users to fold the four support arms into their extended positions, then push each arm into their joints to lock them in place.

The F22 Bracket's support rods each have a 2-stage spring-loaded design, which makes attaching these brackets to F22 fixtures straightforward and quick. Users can simply press opposite arms inward to slip the end hooks into the corner gromets of the fixture.

Additionally, the new F22 Bracket features a far more rigid aluminum rod-style support frame compared to the flat support arms found on the original F22 bracket.

The new F22 Bracket comes with knurled baby pins, much like the original brackets. These knurled baby pins ensures baby pin receivers such as gobo heads can maintain a strong bite onto the baby pin.

Included in the box is a soft carrying case, making transportation and storage of the new F22 bracket convenient.
