- Designed for content creation with **no noise produced**

Target Audience

The amaran Go is a versatile, easy-to-use mini phone light designed for **vloggers, social media influencers, and mobile creators** looking to enhance their content with flexible, high-quality lighting – whether recording makeup tutorials, food reviews, on-the-go vlogs, personal content, or capturing dynamic scenes in your environment.

Designed to snap onto your phone or other devices effortlessly with MagSafe compatibility, the amaran Go is perfect for creators who want high-quality, portable lighting **without the bulk of traditional clip-on lights**. And weighing at 85g, its pocket-sized form can easily fit in your pocket or purse for creating on-the-go.

Built to keep up with your creative flow, its versatile flip design allows for seamlessly switching between different filming angles with your front and rear camera, empowering your content to stand out in a range of environments with lighting that adapts to your vision.

For **creators looking to personalize their setup**, choose between charcoal, white, blue, pink, or green to complement your aesthetic.

¹ Battery runtime at 10% output. At 100% output, battery runtime is 1 hour 21 Min.

² Access lighting effects via the amaran app. SOS flash is triggered by double-tapping on Function button.

Product Description

The amaran Go is an ultra-compact, MagSafe-compatible mini LED phone light for mobile content creators. Featuring magnetic mounting, a versatile flip design, and an industry-first dual built-in mirror light, the amaran Go offers a more convenient, portable, and reliable alternative to traditional clip-on lights, simplifying the creative process for on-the-go lighting setups.

Create effortlessly with MagSafe and Qi2 magnetic compatibility. Securely snap the amaran Go directly to your phone in less than a second with its MagSafe magnetic mount, replacing traditional clip-on lights that often obstruct the camera or feel unsteady. The included MagSafe Adapter Sticker also transforms non-MagSafe compatible devices like laptops into a stable and portable lighting solution.

Flip design for two-way lighting. Whether used for capturing yourself or your surroundings, the amaran Go's intuitive flip design offers lighting flexibility whether creating content with the front or rear camera. Flip the amaran Go open when filming vlogs or taking selfies or collapse it for filming surroundings or other subjects.

Industry-first dual adjustable mirror light for quick touch ups. The amaran Go doubles as your portable beauty companion with a secondary light, combining a makeup mirror with built-in, adjustable lighting. Whether you're adjusting your look in low-light environments or ensuring you're framed for your next shot, the first-of-its-kind dual mirror light ensures you look flawless in any lighting anywhere, anytime.

Fine-tune details with precise adjustments. With 10 adjustable color temperature light modes from 2,700K to 6,500K and 10 brightness settings, tailor your lighting to suit any mood straight from the device – from soft, warm tones to crisp, cool whites. Fine-tune your lighting even further by dialing in exact values or unlock an extra layer of customization with 10 lighting effects with the amaran app.

Softer light you can trust for long content sessions. The amaran Go features high-quality, soft lighting that eliminates harsh shadows and is soft on the eyes, while packing an impressive punch with up to 235 lux at 0.5m – ensuring you look your best on camera with clear, well-balanced lighting even in low-light conditions. And with a long runtime of up to 8 hours and 50 minutes¹, this versatile mini light is the perfect companion for long content sessions or livestreams.

Pocket-sized power for creating on the go. The amaran Go's ultra-compact and lightweight design sets it apart from larger alternatives, making it the perfect pocket-sized lighting solution for creating on the move. Slip the mini light into your pocket or purse without adding additional bulk – even while still attached to your phone.
