

Entour Snow

Code: 1411100026

Part of the ADJ Entour Series of atmospherics, the Entour Snow is a high-output snow machine designed for professional installation and touring applications. The machine is capable of projecting imitation snow upwards to a distance of up to 10m and outwards across a distance of up to 12m, making this unit ideal for large venues and stage productions. The flexible machine offers variable output, with the fan running at 50% or 100%, as well as an inbuilt timer and both 3-pin and 5-pin XLR sockets for DMX control. A ¼-inch jack socket is also provided for use with an optional remote control and a Locking Power input socket provides the unit's mains supply.

Features:

- Professional DMX Snow Machine
- Output: Highest Height: 10m; Longest Distance: 12m
- No warm-up time necessary
- Fluid Consumption Rate: 500ml/min
- Uses ADJ Snow fluid (Code 1223200004 Snow Juice)

Control:

- 4 Operating Modes: built-in timer, manual snow, continuous snow or DMX control
- 3 DMX Channel Modes: 1, 3 or 5 Channels
- Built-In timer
- Optional wired remote control available (Code 1411100029 Entour VT-1 controller)
- Fan speed adjustment 50% or 100%
- LCD Function Display with built-in remote with Timer, Continuous Snow & Manual control
- 2 On/Off buttons for timer and manual snow

Construction:

- Metal Housing
- Hanging Bracket
- External fluid tank: 5,6 Lt

Connections:

- 3- & 5-pin locking DMX In/Out connections
- Locking Power IN connection
- 6,3mm Jack for optional remote controller

Electrical:

- Power Voltage: 120V/50Hz or 230V/60Hz (non-switchable)
- Power Consumption: 1250W

Dimensions & Weight:

- Dimensions (LxWxH): 391 x 550 x 257mm
- Weight: 13,5 kg.
